1

Tell me about a time when you had to solve a complex technical problem. What was your approach?

- I broke it down into smaller parts and tackled each systematically
- I researched online and implemented the first solution I found
- I asked my manager to solve it for me
- I avoided the problem and worked on something else

2

How do you stay updated with the latest technologies in AI and machine learning?

- Regularly read research papers, attend conferences, and work on personal projects
- I rely on what I learned in college
